## *Roofing*

Shiner Roofing, Siding and Windows recently completed a project on Windy Hollow Court that we'd like to show you.

Our work on this property included a complete roof replacement. We removed one layer of existing cedar shake and installed new CertainTeed Grand Manor asphalt roofing shingles, especially suitable for homes with great steep sloped roofs. Over the roof deck, we installed one layer of CertainTeed's Roofer's Select, a protective and water-resistant underlayment designed for use on roof decks beneath roofing shingles. We installed CertainTeed Winterguard, a waterproof shingle underlayment around all penetrations, base of all chimneys, valley transitions and all eaves. New painted aluminum F-style drip edge was installed along all eave edges.

The installation also included new custom formed aluminum counter and oversized step flashing at all chimneys and cricket; new Pro-Flash painted aluminum "W" valley in all valley transitions; and three new Power Cool Plus attic fans with humidistat and thermostat controls to provide adequate exhaust ventilation.

Established in 1981, Shiner Roofing, Siding and Windows specializes in roofing, siding, windows, doors and gutters throughout Northern Virginia and parts of Maryland. Our mission is to determine and implement the right home improvement solutions. Whether it is a simple repair or a complex replacement, we provide fast and friendly services with the highest level of craftsmanship available.
